

Dental Implants – International Patient Treatment & Travel Guide | NouveauVoyage

1. Complete Overview of Dental Implants

Dental implants are advanced titanium-based artificial tooth roots placed into the jawbone to permanently replace missing teeth. They restore chewing function, speech clarity, and natural aesthetics. Implants integrate with bone through a process called osseointegration, making them a long-term and stable solution.

2. Types of Implant Solutions Offered

- Single Tooth Implants
- Multiple Implants with Bridge Support
- Full Arch Restoration (All-on-4 / All-on-6)
- Immediate Load Implants (where suitable)
- Bone Grafting & Sinus Lift Procedures (if required)

3. Step-by-Step Treatment Process

- Free Online Consultation & Case Evaluation
- Review of X-rays / 3D scans before travel
- Personalized Treatment Plan & Transparent Quotation
- Implant Placement Surgery (Local or General Anesthesia)
- Healing Phase (3–6 months depending on case)
- Crown / Final Prosthesis Placement
- Final Smile Adjustment & Check-up

4. Recovery & Healing Timeline

- Mild swelling and discomfort for 3–5 days
- Soft diet recommended for initial weeks
- Avoid smoking during healing period
- Stitches removal within 7–10 days (if non-dissolvable)
- Final crown placement after complete bone integration

5. Risks & Safety Measures

- Temporary swelling or bruising
- Minor bleeding after surgery
- Rare implant rejection
- Strict sterilization and hygiene protocols followed
- All procedures performed by experienced specialists
